

## BATS & CAVES!

### Student Overview of the Geo|Venture for Grades K-4

Are you ready to discover  
the world of bats?

Do you want to dig into  
the science of caves?

Good, because we're ready  
to take you there!

At the Cave of the Winds, you'll be amazed learning about the wild world of bats. We'll explain what they eat and why they're really important to you and your family. We'll talk about different kinds of bats, and we'll show you where they live. We might even see a real bat in the cave!

You'll also get to discover the exciting, underground world of caves. A guide will take you and your classmates into the fun, amazing Cave of the Winds. You'll get to explore the deep secrets of caves, you'll see crazy rock formations that can happen only in caves, and you'll see how the incredible caves were made. Our guide will also take you down a passageway off the main route lit only by hand-held lanterns. You'll be just like the early cave explorers, and you might even see a real bat while you're there! Don't worry, it's not scary, it's caves of fun!

**Since the cave is a little cool, remember to wear a coat. We're waiting for you at the cave!**
